

**ORDINANCE NO. \_\_\_\_\_**

**AN ORDINANCE APPROVING AND ADOPTING APPROPRIATE LAND  
USE AND CONTROL MEASURES TO REDUCE FUTURE FLOOD LOSSES  
IN ALLAMAKEE COUNTY, IOWA IN A MANNER THAT WILL ALLOW  
THE COUNTY TO PARTICIPATE IN THE NATIONAL FLOOD  
INSURANCE PROGRAM  
BE IT ENACTED BY THE ALLAMAKEE COUNTY BOARD OF  
SUPERVISORS:**

ALLAMAKEE COUNTY FLOODPLAIN MANAGEMENT REGULATION

SECTION I - Statutory Authority, Findings of Fact and Purpose

A. Statutory Authority

1. The Legislature of the State of Iowa has in Chapter 335, Code of Iowa, as amended, delegated the power to counties to enact zoning regulations, which among other things, is to secure safety from flood and to protect the health and the general welfare from this type of disaster.
2. House File 759 provided an act requiring counties and cities with flood hazard areas within their boundaries to require participation in the National Flood Insurance Program under certain conditions.
3. Iowa Smart Planning guidelines provided by Iowa Senate File 2389 concentrated on planning for methods of disaster mitigation. Flooding has been identified as the greatest form of catastrophic disasters in this country, state and county.

B. Findings of Fact

1. The flood hazard areas of Allamakee County are subject to periodic inundation which can result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare of the community.
2. These flood losses, hazards and related adverse effects are caused by: (a) The occupancy of flood hazard areas by uses vulnerable to flood damages which create hazardous conditions as a result of being inadequately elevated or otherwise protected from flooding and (b) the cumulative effect of obstructions on the floodplain causing increases in flood heights and velocities.

C. Statement of Purpose

It is the purpose of this Regulation to protect and preserve the rights, privileges and property of Allamakee County and its residents and to preserve and improve the peace, safety, health, welfare, comfort and convenience of its residents by minimizing those flood losses described in Section I.B.1 of this Regulation with provisions designed to:

1. Restrict or prohibit uses which are dangerous to health, safety or property in times of flood or which cause excessive increases in flood heights or velocities,
2. Require that uses vulnerable to floods, including public facilities that serve such uses, be protected against flood damage at the time of initial construction or substantial improvement.
3. Protect individuals from buying lands that may not be suited for intended purposes because of flood hazard.
4. Assure that eligibility is maintained for property owners in the community to purchase flood insurance through the National Flood Insurance Program.

## SECTION II - General Provisions

### A. Lands to Which Regulation Apply

The provisions of this Regulation shall apply to all lands, both zoned and agricultural, within the jurisdiction of Allamakee County, which are located within the boundaries of the Floodplain (Overlay) District as established in Section III.

### B. Rules for Interpretation of Floodplain (Overlay) District

The boundaries of the Floodplain (Overlay) District areas shall be determined by scaling distances on the official Flood Insurance Rate Map. When an interpretation is needed as to the exact location of a boundary, the Zoning Administrator shall make the necessary interpretation. The Board of Adjustment shall hear and decide appeals when it is alleged that there is an error in any requirement, decision or determination made by the Zoning Administrator in the enforcement or administration of this Regulation.

### C. Compliance

No structure or land shall hereafter be used and no structure shall be located, extended, converted or structurally altered without full compliance with the terms of this Regulation and other applicable regulations that apply to uses within the jurisdiction of this Regulation.

### D. Abrogation and Greater Restrictions

It is not intended by this Regulation to repeal, abrogate or impair any existing easements, covenants or deed restrictions. However, where this Regulation imposes greater restrictions, the provision of this Regulation shall prevail. All other ordinances inconsistent with this Regulation are hereby repealed to the extent of the inconsistency only.

## E. Interpretation

In their interpretation and application, the provisions of this Regulation shall be held to be minimum requirements and shall be liberally construed in favor of the governing body and shall not be deemed a limitation or repeal of any other powers granted by State statutes.

## F. Warning and Disclaimer of Liability

The standards required by this Regulation are considered reasonable for regulatory purposes. This Regulation does not imply that areas outside the designated Floodplain (Overlay) District areas will be free from flooding or flood damages. This Regulation shall not create liability on the part of Allamakee County or any officer or employee thereof for any flood damages that from reliance on this Regulation or any administrative decision lawfully made there under.

## G. Severability

If a court of competent jurisdiction adjudges any section, clause, provision or portion of this Regulation unconstitutional or invalid, the remainder of this Regulation shall not be affected thereby.

## SECTION III - Establishment of Floodplain (Overlay) District

The areas within the jurisdiction of Allamakee County having special flood hazards are hereby designated as a Floodplain (Overlay) District and shall be subject to the standards of the Floodplain (Overlay) District (as well as those for the underlying zoning district). The Floodplain (Overlay) District boundaries shall be as shown on the Flood Insurance Rate Map (FIRM) for Allamakee County, dated September 25, 2009.

## SECTION IV - Standards for Floodplain (Overlay) District

All uses must be consistent with the need to minimize flood damage and meet the following applicable performance standards. Where 100-year flood data has not been provided on the Flood Insurance Rate Map, the Iowa Department of Natural Resources shall be contacted to compute such data. The applicant will be responsible for providing the Department of Natural Resources with sufficient technical information to make such determination.

### A. All development within the Floodplain (Overlay) District shall:

1. Be consistent with the need to minimize flood damage.
2. Use construction methods and practices that will minimize flood damage.
3. Use construction materials and utility equipment that are resistant to flood damage.
4. Obtain all other necessary permits from federal, state and local governmental agencies including approval when required from the Iowa Department of Natural Resources.

### B. Residential buildings - All new or substantially improved residential structures shall have the

lowest floor, including basement, elevated a minimum of one (1) foot above the 100-year flood level. Construction shall be upon compacted fill which shall, at all points, be no lower than 1.0 ft. above the 100-year flood level and extend at such elevation at least 18 feet horizontally beyond the limits of any structure erected thereon. Alternate methods of elevating (such as piers) may be allowed subject to proof by a professional engineer's plan taken from contemporary design methods. The plan may be given favorable consideration by the County Board of Adjustment, where existing topography, street grades or other factors preclude elevating by fill. In such cases, the methods used must be adequate to support the structure as well as withstand the various forces and hazards associated with flooding.

All new residential structures shall be provided with a means of access that will be passable by wheeled vehicles during the 100-year flood.

- C. Non-residential buildings - All new or substantially improved non-residential buildings shall have the lowest floor (including basement) elevated a minimum of one (1) foot above the 100-year flood level, or together with attendant utility and sanitary systems, be flood proofed to such a level. When flood proofing is utilized, a professional engineer registered in the State of Iowa shall certify that the flood proofing methods used are adequate to withstand the flood depths, pressures, velocities, impact and uplift forces and other factors associated with the 100-year flood; and that the structure, below the 100-year flood level, is watertight with walls substantially impermeable to the passage of water. A record of the certification indicating the specific elevation (in relation to North American Vertical Datum) to which any structures are flood proofed shall be maintained by the Administrator.

D. All new and substantially improved structures:

1. Fully enclosed areas below the "lowest floor" (not including basements) that are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or meet or exceed the following minimum criteria:
  - a. A minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided.
  - b. The bottom of all openings shall be no higher than one foot above grade.
  - c. Openings may be equipped with screens, louvers, valves, or other coverings or devices provided they permit the automatic entry and exit of floodwaters.

Such areas shall be used solely for parking of vehicles, building access and low damage potential storage.

2. New and substantially improved structures must be designed (or modified) and adequately anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy.
3. New and substantially improved structures must be constructed with electrical, heating,

ventilation, plumbing, air conditioning equipment and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.

E. Factory-built homes:

1. All factory-built homes, including those placed in existing factory-built home parks or subdivisions, shall be elevated on a permanent foundation such that the lowest floor of the structure is a minimum of one (1) foot above the 100-year flood level.
2. All factory-built homes, including those placed in existing factory-built home parks or subdivisions, shall be anchored to resist flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors.

F. Utility and Sanitary Systems:

1. On-site waste disposal and water supply systems shall be located or designed to avoid impairment to the system or contamination from the system during flooding.
2. All new and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of floodwaters into the system as well as the discharge of effluent into floodwaters. Wastewater treatment facilities (other than on-site systems) shall be provided with a level of flood protection equal to or greater than one (1) foot above the 100-year flood elevation.
3. New or replacement water supply systems shall be designed to minimize or eliminate infiltration of floodwaters into the system. Water supply treatment facilities (other than on-site systems) shall be provided with a level of protection equal to or greater than one (1) foot above the 100-year flood elevation.
4. Utilities such as gas or electrical systems shall be located and constructed to minimize or eliminate flood damage to the system and the risk associated with such flood damaged or impaired systems.

G. Storage of materials and equipment that are flammable, explosive or injurious to human, animal or plant life is prohibited unless elevated a minimum of one (1) foot above the 100-year flood level. Other material and equipment must either be similarly elevated or (1) not be subject to major flood damage and be anchored to prevent movement due to flood waters or (2) be readily removable from the area within the time available after flood warning.

H. Flood control structural works such as levees, floodwalls, etc. shall provide, at a minimum, protection from a 100-year flood with a minimum of 3 ft. of design freeboard and shall provide for adequate interior drainage. In addition, structural flood control works shall be approved by the Department of Natural Resources.

I. Watercourse alterations or relocations must be designed to maintain the flood carrying capacity within the altered or relocated portion. In addition, such alterations or relocations must be approved by the Department of Natural Resources.

J. Subdivisions (including factory-built home parks and subdivisions) shall be consistent with the need to minimize flood damages and shall have adequate drainage provided to reduce exposure to flood damage. Development associated with subdivision proposals (including the installation of public utilities) shall meet the applicable performance standards of this Regulation. Subdivision proposals intended for residential use shall provide all lots with a means of access that will be passable by wheeled vehicles during the 100-year flood. Proposals for subdivisions greater than five (5) acres or fifty (50) lots (whichever is less) shall include 100-year flood elevation data for those areas located within the Floodplain (Overlay) District.

K. Accessory Structures

1. Detached garages, sheds, and similar structures accessory to a residential use are exempt from the 100-year flood elevation requirements where the following criteria are satisfied:
  - a. The structure shall not be used for human habitation.
  - b. The structure shall be designed to have low flood damage potential.
  - c. The structure shall be constructed and placed on the building site so as to offer minimum resistance to the flow of floodwaters.
  - d. The structure shall be firmly anchored to prevent flotation that may result in damage to other structures.
  - e. The structure's service facilities, such as electrical and heating equipment, shall be elevated or flood proofed to at least one foot above the 100-year flood level.
2. Exemption from the 100-year flood elevation requirements for such a structure may result in increased premium rates for flood insurance coverage of the structure and its contents.

L. Recreational Vehicles

1. Recreational vehicles are exempt from the requirements of Section IV. E. of this Regulation regarding anchoring and elevation of factory-built homes when the following criteria are satisfied:
  - a. The recreational vehicle shall be located on the site for less than 180 consecutive days, and,
  - b. The recreational vehicle must be fully licensed and ready for highway use. A recreational vehicle is ready for highway use if it is on its wheels or jacking system and is attached to the site only by quick disconnect type utilities and security devices and has no permanently attached additions.
2. Recreational vehicles that are located on the site for more than 180 consecutive days or are not ready for highway use must satisfy requirements of Section IV. E. of this Regulation regarding anchoring and elevation of factory-built homes.

M. Pipeline river and stream crossings shall be buried in the streambed and banks, or otherwise sufficiently protected to prevent rupture due to channel degradation and meandering.

## SECTION V - Administration

### A. Appointment, Duties and Responsibilities of Floodplain Administrator

1. The Zoning Administrator is hereby appointed to implement and administer the provisions of this Regulation and will herein be referred to as the Administrator.
2. Duties of the Administrator shall include, but not necessarily be limited to the following:
  - a. Review all floodplain development permit applications to assure that the provisions of this Regulation will be satisfied.
  - b. Review floodplain development applications to assure that all necessary permits have been obtained from federal, state and local governmental agencies including approval when required from the Department of Natural Resources for floodplain construction.
  - c. Record and maintain a record of the elevation (in relation to North American Vertical Datum) of the lowest floor (including basement) of all new or substantially improved structures in the Floodplain (Overlay) District.
  - d. Record and maintain a record of the elevation (in relation to North American Vertical datum) to which all new or substantially improved structures have been flood proofed.
  - e. Notify adjacent communities/counties and the Department of Natural Resources prior to any proposed alteration or relocation of a watercourse and submit evidence of such notifications to the Federal Emergency Management Agency.
  - f. Keep a record of all permits, appeals and such other transactions and correspondence pertaining to the administration of this Regulation.

### B. Floodplain Development Permit

1. Permit Required - A Floodplain Development Permit issued by the Administrator shall be secured prior to any floodplain development (any man-made change to improved and unimproved real estate, including but not limited to buildings or other structures, mining, filling, grading, paving, excavation or drilling operations), including the placement of factory-built homes.
2. Application for Permit - Application shall be made on forms furnished by the Administrator and shall include the following:

- a. Description of the work to be covered by the permit for which application is to be made.
  - b. Description of the land on which the proposed work is to be done (i.e., lot, block, track, street address or similar description) that will readily identify and locate the work to be done.
  - c. Indication of the use or occupancy for which the proposed work is intended.
  - d. Elevation of the 100-year flood.
  - e. Elevation (in relation to North American Vertical Datum) of the lowest floor (including basement) of buildings or of the level to which a building is to be flood proofed.
  - f. For buildings being improved or rebuilt, the estimated cost of improvements and market value of the building prior to the improvements.
  - g. Such other information as the Administrator deems reasonably necessary (e.g., drawings or a site plan) for the purpose of this Regulation.
3. Action on Permit Application - The Administrator shall, within a reasonable time make a determination as to whether the proposed floodplain development meets the applicable standards of this Regulation and shall approve or disapprove the application. For disapprovals, the applicant shall be informed, in writing, of the specific reasons therefore. The Administrator shall not issue permits for variances except as directed by the County Board of Adjustment.
  4. Construction and Use to be as provided in Application and Plans - Floodplain Development Permits based on the basis of approved plans and applications authorize only the use, arrangement, and construction set forth in such approved plans and applications and no other use, arrangement or construction. Any use, arrangement, or construction at variance with that authorized shall be deemed a violation of this Regulation. The applicant shall be required to submit certification by a professional engineer or land surveyor, as appropriate, registered in the State of Iowa, that the finished fill, building floor elevations, flood proofing or other flood protection measures were accomplished in compliance with the provisions of this Regulation prior to the use or occupancy of any structure.

### C. Variance

1. The Board of Adjustment may authorize upon request in specific cases such variances from the terms of this Regulation that will not be contrary to the public interest where, owing to special conditions, a literal enforcement of the provisions of this Regulation will result in unnecessary hardship. Variances granted must meet the following applicable standards.
  - a. Variances shall only be granted upon: (i) a showing of good and sufficient cause, (ii) a determination that failure to grant the variance would result in exceptional hardship

to the applicant, and (iii) a determination that the granting of the variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public or conflict with existing local codes or ordinances.

- b. Variances shall only be granted upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.
  - c. In cases where the variance involves a lower level of flood protection for buildings than what is ordinarily required by this Regulation, the applicant shall be notified in writing over the signature of the Administrator that: (i) the issuance of a variance will result in increased premium rates for flood insurance up to amounts as high as \$25 for \$100 of insurance coverage and (ii) such construction increases risks to life and property.
2. Factors Upon Which the Decision of the Board of Adjustment Shall be Based - In passing upon applications for Variances, the Board shall consider all relevant factors specified in other sections of this Regulation, including:
- a. The danger to life and property due to increased flood heights or velocities caused by encroachments.
  - b. The danger that materials may be swept on to other land or downstream to the injury of others.
  - c. The proposed water supply and sanitation systems and the ability of these systems to prevent disease, contamination and unsanitary conditions.
  - d. The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner.
  - e. The importance of the services provided by the proposed facility to the County.
  - f. The requirements of the facility for a floodplain location.
  - g. The availability of alternative locations not subject to flooding for the proposed use.
  - h. The compatibility of the proposed use with existing development and development anticipated in the foreseeable future.
  - i. The relationship of the proposed use to the comprehensive plan and floodplain management program for the area.
  - j. The safety of access to the property in times of flood for ordinary and emergency vehicles.
  - k. The expected heights, velocity, duration, rate of rise and sediment transport of the floodwater expected at the site.

1. The cost of providing governmental services during and after flood conditions, including maintenance and repair of public utilities (sewer, gas, electrical and water systems), facilities, streets and bridges.
- m. Such other factors which are relevant to the purpose of this Regulation.
3. Conditions Attached to Variances - Upon consideration of the factors listed above, the Board of Adjustment may attach such conditions to the granting of variances, as it deems necessary to further the purpose of this Regulation. Such conditions may include, but not necessarily be limited to:
  - a. Modification of waste disposal and water supply facilities.
  - b. Limitation of periods of use and operation.
  - c. Imposition of operational controls, sureties and deed restrictions.
  - d. Requirements for construction of channel modifications, dikes, levees and other protective measures, provided such are approved by the Department of Natural Resources and are deemed the only practical alternative to achieving the purpose of this Regulation.
  - e. Flood proofing measures.

#### SECTION VI - Nonconforming Uses

- A. A structure or the use of a structure or premises which was lawful before the passage or amendment of this Regulation but which is not in conformity with the provisions of this Regulation may be continued subject to the following conditions:
  1. If such use is discontinued for six (6) consecutive months, any future use of the building premises shall conform to this Regulation.
  2. Uses or adjuncts thereof that are or become nuisances shall not be entitled to continue as nonconforming uses.
- B. If any nonconforming use or structure is destroyed by any means, including flood, it shall not be reconstructed if the cost is more than fifty (50) percent of the market value of the structure before the damage occurred, unless it is reconstructed in conformity with the provisions of this Regulation. This limitation does not include the cost of any alteration to comply with existing state or local health, sanitary, building or safety codes or regulations or the cost of any alteration of a structure listed on the National Register of Historic Places, provided that the alteration shall not preclude its continued designation.

#### SECTION VII - Penalties for Violation

- A. Any person, firm, or corporation who shall violate or fail to comply with the provisions of this Floodplain Management Regulation shall be guilty of a County Infraction and upon conviction shall be fined not more than seven hundred fifty dollars (\$750.00) or

imprisoned for not more than thirty (30) days and shall pay all costs and expenses involved in the prosecution of the violation. Each day such continued violation shall constitute a separate offense.

- B. In case a building or structure is erected, constructed, reconstructed, altered, repaired, converted or maintained, or any building, structure or land is used in violation of this Regulation, the appropriate authorities of Allamakee County, in addition to other remedies, may institute injunction, mandamus, civil infractions or other appropriate action or proceeding to prevent such unlawful erection, construction, reconstruction, alteration, conversion, maintenance or use, or to correct or abate such violations, or to prevent the occupancy of said building, structure or land.
- C. All reasonable expenses incurred by Allamakee County in proceeding to enforce any order issued by the Zoning Administrator may be recovered by suit in the event Allamakee County is the prevailing party. Allamakee County may certify the amount of such expense to the extent awarded, together with a description of the property, to the County Treasurer, who shall enter the same upon the tax books as cost for obtaining compliance with the order of the Zoning Administrator and said amount shall be collected as other taxes.
- D. Peace officers, when called upon by Allamakee County or its authorized representatives, including the Zoning Administrator, shall assist in the enforcement of the rules, regulations and lawful orders of the Commission. No person shall interfere with the authorized agents of Allamakee County or peace officers in the discharge of any duty imposed by law or rules of the County Floodplain Management Regulations.
- E. In the event any person is aggrieved by any decision or order made by the Zoning Administrator, he/she may appeal to the Board of Adjustment. Any person or persons aggrieved by any decision of the Board of Adjustment, or any taxpayer, or any officer, department, board or bureau of the County, may present to a court of record a petition, duly verified, within thirty (30) days after the filing of the decision in the office of the Board of Adjustment, in the manner set forth in Code of Iowa, and judicial review may then take place as provided by Code of Iowa.

#### SECTION VIII - Amendments

The regulations and standards set forth in this Regulation may from time to time be amended, supplemented, changed, or repealed. No amendment, supplement, change or modification shall be undertaken without prior approval of the Department of Natural Resources.

#### SECTION IX - Definitions

Unless specifically defined below, words or phrases used in this Regulation shall be interpreted so as to give them the meaning they have in common usage and to give this Regulation its most reasonable application.

**BASE FLOOD** - The flood having a one (1) percent chance of being equaled or exceeded in any given year. (See 100-year flood).

**BASEMENT** - Any enclosed area of a building that has its floor or lowest level below ground level

(sub grade) on all sides. Also see "lowest floor."

**DEVELOPMENT** - Any man-made change to improved or unimproved real estate, including but not limited to building or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations.

**EXISTING CONSTRUCTION** - Any structure for which the "start of construction" commenced before the effective date of the first floodplain management regulations adopted by the County.

**EXISTING FACTORY-BUILT HOME PARK OR SUBDIVISION** - A factory-built home park or subdivision for which the construction of facilities for servicing the lots on which the factory-built homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets and either final site grading or the pouring of concrete pads) is completed before the effective date of the first floodplain management regulations adopted by the community

**EXPANSION OF EXISTING FACTORY-BUILT HOME PARK OR SUBDIVISION** - The preparation of additional sites by the construction of facilities for servicing the lots on which the factory-built homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads).

**FACTORY-BUILT HOME** - Any structure designed for residential use, which is wholly or in substantial part, made, fabricated, formed or assembled in manufacturing facilities for installation or assembly and installation on a building site. For the purpose of this Regulation factory-built homes include mobile homes, manufactured homes, modular homes and also includes "recreational vehicles" which are placed on a site for greater than 180 consecutive days and not fully licensed for and ready for highway use.

**FACTORY-BUILT HOME PARK** - A parcel or contiguous parcels of land divided into two or more factory-built home lots for sale or lease.

**FLOOD** - A general and temporary condition of partial or complete inundation of normally dry land areas resulting from the overflow of streams or rivers or from the unusual and rapid runoff of surface waters from any source.

**FLOOD ELEVATION** - The elevation floodwaters would reach at a particular site during the occurrence of a specific flood. For instance, the 100-year flood elevation is the elevation of floodwaters related to the occurrence of the 100-year flood.

**FLOOD INSURANCE RATE MAP (FIRM)** - The official map prepared as part of (but published separately from) the Flood Insurance Study that delineates both the flood hazard areas and the risk premium zones applicable to the community.

**FLOODPLAIN** - Any land area susceptible to being inundated by water as a result of a flood.

**FLOODPLAIN MANAGEMENT** - An overall program of corrective and preventive measures for reducing flood damages and promoting the wise use of floodplains, including but not limited

to emergency preparedness plans, flood control works, flood proofing and floodplain management regulations.

**FLOODPROOFING** - Any combination of structural and nonstructural additions, changes or adjustments to structures, including utility and sanitary facilities, which will reduce or eliminate flood damage to such structures.

**FLOODWAY** - The channel of a river or stream and those portions of the floodplains adjoining the channel, which are reasonably required to carry and discharge flood waters or flood flows so that confinement of flood flows to the floodway area will not cumulatively increase the water surface elevation of the base flood by more than one (1) foot.

**FLOODWAY FRINGE** - Those portions of the floodplain, other than the floodway, which can be filled, levied, or otherwise obstructed without causing substantially higher flood levels or flow velocities.

**HISTORIC STRUCTURE** - Any structure that is:

- a. Listed individually in the National Register of Historic Places, maintained by the Department of Interior, or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing of the National Register;
- b. Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district;
- c. Individually listed on a state inventory of historic places in states with historic preservation programs which have been approved by the Secretary of the Interior; or
- d. Individually listed on a local inventory of historic places in communities with historic preservation programs. These structures would have been certified by either (1) an approved state program as determined by the Secretary of the Interior or (2) directly by the Secretary of the Interior in states without approved programs.

**LOWEST FLOOR** - The floor of the lowest enclosed area in a building including a basement except when all the following criteria are met:

- a. The enclosed area is designed to flood to equalize hydrostatic pressure during floods with walls or openings that satisfy the provisions of Section IV.D. 1 of this Regulation and
- b. The enclosed area is unfinished (not carpeted, dry walled, etc.) and used solely for low damage potential uses such as building access, parking or storage, and
- c. Machinery and service facilities (e.g., hot water heater, furnace, electrical service) contained in the enclosed area are located at least one (1) foot above the 100-year flood level, and
- d. The enclosed area is not a "basement" as defined in this section.

In cases where the lowest enclosed area satisfies criteria a, b, c and d above, the lowest floor is the floor of the next highest enclosed area that does not satisfy the criteria above.

**NEW CONSTRUCTION** - (new buildings, factory-built home parks) - Those structures or development for which the start of construction commenced on or after the effective date of the first floodplain management regulations adopted by the community and includes any subsequent improvements to such structures.

**NEW FACTORY-BUILT HOME PARK OR SUBDIVISION** - A factory-built home park or subdivision for which the construction of facilities for servicing the lots on which the factory-built homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed on or after the effective date of the effective date of the first floodplain management regulations adopted by the community and includes any subsequent improvements to such structures.

**ONE HUNDRED (100) YEAR FLOOD** - A flood, the magnitude of which has a one (1) percent chance of being equaled or exceeded in any given year or which, on the average, will be equaled or exceeded a least once every one hundred (100) years.

**RECREATIONAL VEHICLE** - A vehicle that is:

- a. Built on a single chassis;
- b. Four hundred (400) square feet or less when measured at the largest horizontal projection;
- c. Designed to be self-propelled or permanently towable by a light duty truck; and
- d. Designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel or seasonal use.

**SCALING** – Making a determination whether the intended development is within or outside of the floodplain overlay district.

**SPECIAL FLOOD HAZARD AREA** - The land within the County subject to the "100-year flood". This land is identified as Zone A on the community's FLOOD INSURANCE RATE MAP (FIRM).

**START OF CONSTRUCTION** - Includes substantial improvement, and means the date the development permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement or other improvement, was within 180 days of the permit date. The actual start means either the first placement or permanent construction of a structure on a site, such as pouring of a slab or footings, the installation of pile, the construction of columns or any work beyond the stage of excavation; or the placement of a factory-built home on a foundation.

Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings such as garages or sheds not occupied as

dwelling units or not part of the main structure. For a substantial improvement, the actual start of construction means the first alteration of any wall, ceiling, floor or other structural part of the building, whether or not that alteration affects the external dimensions of the building.

**STRUCTURE** - Anything constructed or erected on the ground or attached to the ground, including, but not limited to, buildings, factories, sheds, cabins, factor-built homes, storage tanks and other similar uses. Fences are exempt as structures for the purposes of this Regulation.

**SUBSTANTIAL DAMAGE** - Damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damage condition would equal or exceed fifty (50) percent of the market value of the structure before the damage occurred.

**SUBSTANTIAL IMPROVEMENT** - Any improvement to a structure which satisfies either of the following criteria:

1. Any repair, reconstruction or improvement of a structure, the cost of which equals or exceeds fifty (50) percent of the market value of the structure either (a) before the "start of construction" of the improvement, or (b) if the structure has been "substantially damaged" and is being restored, before the damage occurred.

The term does not, however, include any project for improvement of a structure to correct existing violations of state or local health, sanitary or safety code specifications which have been identified by the local code enforcement official and which are the minimum necessary to assure safe living conditions. The term also does not include any alteration of an "historic structure," provided the alteration will not preclude the structure's designation as an "historic structure."

2. Any addition which increases the original floor area of a building by 25 percent or more. All additions constructed on or after the first floodplain management regulations adopted by the community shall be added to any proposed addition in determining whether the total increase in original floor space would exceed 25 percent.

**VARIANCE** - A grant of relief by the County from the terms of the floodplain management regulations.

**VIOLATION** - The failure of a structure or other development to be fully compliant with the community's floodplain management regulations.

**SECTION X** – All other ordinances or parts of ordinances in conflict herewith are hereby repealed to the extent of such conflict.

**SECTION XI** – This ordinance is in full force and effect from and after its adoption and publication as provided by law.

**ADOPTED AND PASSED** by the Board of Supervisors of the County of Allamakee this \_\_\_\_\_ day of \_\_\_\_\_, 201\_.

Chairman

Seal of County

Attest:

County Auditor
